HANDLING LUXURY SINCE 1942

EN At Quincalux, we have been inspiring Architecture with Craftsmanship since 1942. For eighty years we have been blending tradition and innovation, made by hand in Belgium, with a never-ending search for improving techniques.

Driven by quality, we solely craft our door handles into timeless designs with noble materials such as brass and aluminium as these age perfectly and are sustainable, a characteristics which we keep close to heart. Today, our product range extends in two directions : a traditional Classic Collection and an innovative Contemporary Collection.

FR Chez Quincalux, nous inspirons l'architecture par notre savoir-faire artisanal depuis 1942. Depuis quatre-vingts ans, nous allions tradition et innovation, fabrication à la main en Belgique et recherche permanente d'optimisation de nos techniques.

Passionnés par la qualité, nous réalisons uniquement des poignées de porte au design intemporel avec des matériaux nobles tels que le laiton et l'aluminium, qui vieillissent parfaitement et sont durables, un aspect qui nous tient particulièrement à cœur. Aujourd'hui, notre gamme de produits est axée vers deux directions : une collection classique traditionnelle et une collection contemporaine placée sous le signe de l'innovation.

NL Bij Quincalux inspireren we Architectuur met Vakmanschap sinds 1942. Al tachtig jaar lang combineren we traditie en innovatie, met de hand gemaakt in België, met een nooit eindigende zoektocht naar verbeterde technieken.

Gedreven door kwaliteit, maken we onze deurgrepen uitsluitend tot tijdloze ontwerpen met edele materialen zoals messing en aluminium, omdat deze perfect verouderen en duurzaam zijn, een kenmerk dat we nauw aan het hart houden. Vandaag de dag strekt ons productassortiment zich uit in twee richtingen: een traditionele Classic Collection en een innovatieve Contemporary Collection.

©Alexander D'Hiet

GENERATIONS OF BELGIAN CRAFTSMANSHIP

EN Design and craftsmanship, hand-made in Belgium. Quincalux guarantees traditional craftsmanship with modern technological ingenuity.

Every part turned, milled hot-pressed or cast in a sand bed is considered and detailed with care and passion for the craft. From the crank pin to the adjusting bolt; from the groove to the handle, it is always the result of a meticulous design and production process.

Cutting-edge innovative technology helps polish the true métier, but the hand always comes first at Quincalux. The knowledge is at hand and passed on from generation to generation. Every new product created by designers for architects always passes through many hands.

That's what it's always meant for.

GÉNÉRATIONS D'ARTISANTS BELGES

FR Design et artisanat, fabrication à la main en Belgique. Quincalux garantit un artisanat traditionnel combiné à l'ingéniosité technologique moderne.

Chaque pièce tournée, fraisée, pressée à chaud ou coulée est manipulée avec soin et passion. L'attention au détail est au cœur de nos processus de conception et de production.

Si une technologie innovante de pointe soutient nos artisans, Quincalux privilégie toujours le travail à la main, en particulier pour les finitions. Notre savoir-faire se transmet de génération en génération. Chaque nouveau produit créé par des designers pour des architectes passe toujours par plusieurs mains avant validation.

Jusqu'à arriver dans les vôtres.

GENERATIES BELGISCH VAKMANSCHAP

NL Design en vakmanschap, handgemaakt in België. Quincalux staat garant voor traditioneel vakmanschap met moderne technologische vindingrijkheid.

Elk onderdeel gedraaid, gefreesd, warmgeperst of gegoten in een zandbed wordt met zorg en passie voor het ambacht overwogen en gedetailleerd. Van de krukpen tot de stelbout; van de groef tot de hendel, het is altijd het resultaat van een nauwgezet ontwerp- en productieproces.

Geavanceerde innovatieve technologie helpt het ware metier te polijsten, maar de hand staat bij Quincalux altijd voorop. De kennis is bij de hand en wordt van generatie op generatie doorgegeven. Elk nieuw product dat door ontwerpers voor architecten wordt gemaakt, gaat altijd door vele handen.

Daar is het altijd voor bedoeld.

DOOR DESIGN

EN Quincalux is proud to work with internationally renowned designers, architects and interior architects for the creation of their new collections.

They are supported by the internal development team and the creative director of Quincalux, Frederik Delbart.

FR Quincalux collabore avec des designers, des architectes et des architectes d'intérieur à la renommée internationale pour la création de ses nouvelles collections.

Ils sont soutenus par l'équipe de développement interne et par le directeur créatif de Quincalux, Frederik Delbart.

NL Quincalux is trots om samen te werken met internationaal gerenommeerde ontwerpers, architecten en interieurarchitecten voor de creatie van hun nieuwe collecties.

Ze worden ondersteund door het interne ontwikkelingsteam en de creatief directeur van Quincalux, Frederik Delbart.

TOKYO

FREDERIK DELBART

Creative Director & Designer

EN Frederik Delbart's interdisciplinary approach reaches from product design to strategic design management and creative direction.

Since 2015, he has been active as Creative Director for Quincalux, collaborating closely with the direction and setting the lines for collections and branding and bringing the company's brand to the next level. In 2018, Delbart was awarded the prestigious title of 'Belgian Designer of the Year'. He's internationally acclaimed for his thoughtful design philosophy, in which nothing is left to chance.

The collections from his hand are Tokyo, London, Paris, Antwerp, Cannes, Oslo, Royal, Imperial, Copenhagen, Athena, Kyoto and Osaka.

FR L'approche interdisciplinaire de Frederik Delbart comprend le design de produits ainsi que la gestion stratégique du design et une direction créative.

Depuis 2015, il endosse le rôle de directeur créatif pour Quincalux, en étroite collaboration avec la direction. Il établit la stratégie, les collections et le branding, et élève la marque de l'entreprise à un niveau supérieur. En 2018, Frederik Delbart s'est vu attribuer le prestigieux titre de Designer belge de l'année. Il est reconnu au niveau international pour sa philosophie de conception réfléchie, dans laquelle rien n'est laissé au hasard.

Pour Quincalux, il a conçu les collections Tokyo, London, Paris, Antwerp, Cannes, Oslo, Royal, Imperial, Copenhagen, Athena, Kyoto et Osaka.

NL Frederik Delbart's interdisciplinaire aanpak strekt zich uit van productontwerp tot strategisch designmanagement en creatieve richting.

Sinds 2015 is hij actief als Creatief Directeur bij Quincalux, waar hij nauw samenwerkt met de directie, de lijnen uitzet voor collecties en branding, en het merk naar een hoger niveau tilt. In 2018 ontving Delbart de prestigieuze titel 'Belgisch Designer van het Jaar'. Hij wordt internationaal geprezen om zijn doordachte ontwerpfilosofie, waarin niets aan het toeval wordt overgelaten.

De collecties die uit zijn hand komen zijn Tokyo, London, Paris, Antwerp, Cannes, Oslo, Royal, Imperial, Copenhagen, Athena, Kyoto en Osaka.

PALMA

JULIEN RENAULT

Designer

www.julienrenaultobjects.com

EN Julien Renault grew up outside Paris and attended design schools both in France (Reims School of Art and Design) and in Switzerland (ECAL). Two different cultures and approaches to design which have partly shaped Renault's own way of addressing his work. On the one hand artistic, free and personal, on the other hand systemic, objective and rational.

Renault uses both pragmatism and intuition when he dives into a new project, creating a dialogue between sense and sensibility. The cross-disciplinary output is suitable for a designer such as Renault who is grounded in his vision of essentialism. He thinks and works conceptually and throughout each project follows a precise and recognisable image. For Quincalux he created the Palma Collection.

FR Julien Renault a grandi en région parisienne et a fréquenté des écoles de design en France (École Supérieure d'Art et de Design de Reims) et en Suisse (ECAL), deux cultures et deux approches différentes du design qui ont contribué à façonner la manière dont Renault aborde son travail. D'un côté artistique, libre et personnel, de l'autre systémique, objectif et rationnel.

Renault se sert de son pragmatisme et de son intuition lorsqu'il se plonge dans un nouveau projet, créant ainsi un dialogue entre le sens et la sensibilité. Cette approche interdisciplinaire convient à un designer tel que Renault, ancré dans sa vision de l'essentiel. Il pense et travaille de manière conceptuelle et chaque projet suit une image précise et reconnaissable. Il a créé pour Quincalux la collection Palma.

NL Julien Renault groeide op in de regio Parijs en studeerde aan designscholen in Frankrijk (École Supérieure d'Art et de Design de Reims) en Zwitserland (ECAL). Deze twee culturen en verschillende benaderingen van design hebben bijgedragen aan de manier waarop Renault zijn werk benadert. Enerzijds artistiek, vrij en persoonlijk; anderzijds systematisch, objectief en rationeel.

Renault maakt gebruik van zijn pragmatisme en intuïtie wanneer hij aan een nieuw project begint, en creëert zo een dialoog tussen betekenis en gevoeligheid. Deze interdisciplinaire aanpak past perfect bij een ontwerper als Renault, die stevig verankerd is in zijn visie op het essentiële. Hij denkt en werkt conceptueel, en elk project volgt een duidelijke en herkenbare lijn. Voor Quincalux ontwierp hij de collectie Palma.

HELSINKI

JEFFREY HUYGHE

Designer

www.jeffreyhuyghe.com

EN Jeffrey Huyghe graduated as an industrial product designer at Howest, Kortrijk. With a heart for engineering, Jeffrey likes to experiment with geometrical shapes and dynamic interactions. This translates in an interesting tension where minimalism and materialisation meet state-of-the-art engineering.

Examples are multi-awarded architectural lighting designs like Semih (2016) and Marbul (2018) where complex hidden rotational systems are disguised as pure designs. Recently he started his own studio where, beyond lighting, he can push further the boundaries of the interaction between materials and mechanics. The Helsinki Collection was designed by Jeffrey Huyghe.

FR Jeffrey Huyghe est diplômé en tant que designer de produits industriels à Howest, Courtrai. Avec un cœur pour l'ingénierie, Jeffrey aime expérimenter les formes géométriques et les interactions dynamiques. Cela se traduit par une tension intéressante où minimalisme et matérialisation rencontrent une ingénierie de pointe.

Des exemples sont des conceptions d'éclairage architecturales multi-primées comme Semih (2016) et Marbul (2018) où des systèmes de rotation cachés complexes sont déguisés en conceptions pures. Il a récemment créé son propre studio où, au-delà de l'éclairage, il peut repousser les limites de l'interaction entre les matériaux et la mécanique. La collection Helsinki a été conçue par Jeffrey Huyghe.

NL Jeffrey Huyghe studeerde af als industrieel productontwerper aan Howest, Kortrijk. Met een passie voor techniek experimenteert Jeffrey graag met geometrische vormen en dynamische interacties. Dit resulteert in een interessante spanning waarin minimalisme en materialisatie samenkommen met geavanceerde technologie.

Voorbeelden hiervan zijn architecturale verlichtingsontwerpen die meerdere prijzen hebben gewonnen, zoals Semih (2016) en Marbul (2018), waarbij complexe verborgen roterende systemen worden verwerkt in pure ontwerpen. Onlangs heeft hij zijn eigen studio opgericht, waar hij, naast verlichting, de grenzen kan verleggen van de interactie tussen materialen en mechanica. De collectie Helsinki werd ontworpen door Jeffrey Huyghe.

COMO

LIEVEN MUSSCHOOT

CAS MOOR

Interior Architect
& Designer

www.lmcm.be

EN Interior architect Lieven Musschoot has an impressive track record in the field of hospitality projects. In the many trendy bars and acclaimed restaurants, he always manages to add a new dimension to the concept of tasteful design. No detail goes unnoticed.

Since 2014, he has also been reinforced by Cas Moor, a pur sang product designer. Together the duo develops complete projects, from interiors to custom lighting, furniture and accessories. LMCM designed the Como collection for Quincalux.

FR L'architecte d'intérieur Lieven Musschoot peut se targuer de posséder un palmarès impressionnant dans le domaine des projets d'hospitalité. Mieux que quiconque, il sait toujours ajouter une nouvelle dimension au concept de design de bon goût dans les nombreux bars branchés et restaurants de renom. Aucun détail ne passe inaperçu.

En 2014, il a été rejoint par Cas Moor, un designer de produits pure souche. Ensemble, le duo développe des projets complets, des intérieurs aux luminaires sur mesure, en passant par le mobilier et les accessoires. LMCM a conçu la collection Como pour Quincalux.

NL Interieurarchitect Lieven Musschoot heeft een indrukwekkend trackrecord op het gebied van hospitality-projecten. In de vele trendy bars en gerenommeerde restaurants weet hij telkens een nieuwe dimensie toe te voegen aan het concept van stijlvol design. Geen enkel detail ontgaat zijn aandacht.

Sinds 2014 wordt hij versterkt door Cas Moor, een productontwerper pur sang. Samen ontwikkelt het duo complete projecten, variërend van interieurs tot op maat gemaakte verlichting, meubels en accessoires. LMCM ontwierp de Como-collectie voor Quincalux.

IMPERIAL

THE
CONTEMPORARY
COLLECTION

The Tokyo Collection draws inspiration from Japanese craftsmanship and ergonomic design, emphasizing balance as a central element. Its raindrop shape is thoughtfully crafted to fit perfectly in the hand, offering a seamless blend of comfort and functionality.

La Collection Tokyo s'inspire de l'artisanat japonais et du design ergonomique, mettant l'accent sur l'équilibre comme élément central. Sa forme en goutte de pluie est soigneusement conçue pour s'adapter parfaitement à la main, offrant un mélange harmonieux de confort et de fonctionnalité.

De Tokyo Collectie is geïnspireerd op Japans vakmanschap en ergonomisch design, waarbij balans centraal staat. De regendruppelvorm is zorgvuldig ontworpen om perfect in de hand te liggen en biedt een naadloze mix van comfort en functionaliteit.

LONDON

DESIGN BY FREDERIK DELBART

As the eponymous city, this vibrant design of contemporary hardware blends a traditional language with a modernistic edge. Based on the visual idea of ripples in the water, the bold yet refined London Collection is as versatile as the city.

En tant que ville éponyme, ce design dynamique de quincaillerie allie la sophistication des techniques de fabrication traditionnelles à une touche moderniste. Basée sur le rythme des ondulations de l'eau, la collection London, audacieuse et raffinée, est aussi polyvalente que la ville.

Als gelijknamige stad combineert dit levendige ontwerp van hedendaagse hardware een traditionele taal met een modernistische rand. Gebaseerd op het visuele idee van rimpelingen in het water, is de gedurfde maar verfijnde London Collection net zo veelzijdig als de stad.

Art. 193-25

The Royal Collection lets classicism and modernity collide, drawing the eye through the gentle grooves, as the monolithic design takes its inspiration from the traditional columns of Ancient Rome.

La collection Royal fusionne le classicisme et de la modernité, en attirant le regard à travers des douces rainures, tandis que le design monolithique s'inspire des colonnes traditionnelles de la Rome antique.

De Royal collectie brengt classicisme en moderniteit samen en trekt de aandacht door de zachte groeven, terwijl het monolithische ontwerp zijn inspiratie haalt uit de traditionele zuilen van het oude Rome.

MONTRÉUX

Montreux, located on the Lac Léman in Switzerland, is the doorway to the Swiss Mountain-region. Numerous mountain-chains, running rivers as well as the Lac Léman carve into the landscape. Quincalux designed a new collection, where new tools are cutting into brass, creating knurled patterns.

Montreux, située au bord du lac Léman en Suisse, est la porte d'entrée de la région de montagne Suisse. De nombreuses chaînes de montagnes, des rivières courantes ainsi que le lac Léman taillent le paysage. Quincalux a conçu une nouvelle collection, dans laquelle de nouveaux outils coupent le laiton et créent des motifs guillochés.

Montreux, gelegen aan het Lac Léman in Zwitserland, is de toegangspoort tot de Zwitserse bergregio. Talrijke bergketens, stromende rivieren en het Lac Léman kerven in het landschap. Quincalux ontwierp een nieuwe collectie, waarbij nieuw gereedschap in messing wordt gesneden, waardoor gekartelde patronen ontstaan.

CASSIS

The Cassis Collection features round handles with an elegant, harmonious, and distinctly modern design. Perfect for enhancing front doors and double doors, these handles can be installed in a fixed position. A perfect balance of aesthetics and functionality.

La Collection Cassis se distingue par ses poignées rondes au design élégant, harmonieux et résolument moderne. Parfaites pour sublimer les portes d'entrée et les doubles portes, elles peuvent être installées en position fixe. Une alliance parfaite entre esthétique et fonctionnalité.

De Cassis-collectie kenmerkt zich door ronde handgrepen met een elegant, harmonieus en eigentijds design. Perfect om voordeuren en dubbele deuren te verfraaien, deze handgrepen kunnen in een vaste positie worden gemonteerd. Een perfecte balans tussen esthetiek en functionaliteit.

MONACO

The Monaco Collection combines the elegance of a round handle with a delicately engraved edge detail. This unique design creates beautiful reflections, reminiscent of the refined texture of a jewel. A perfect blend of style and sophistication for your doors.

La Collection Monaco allie l'élégance d'une poignée ronde à un détail subtilement ciselé sur la tranche. Ce design unique offre de magnifiques reflets, évoquant la texture précieuse d'un bijou. Une véritable fusion de style et de sophistication pour vos portes.

De Monaco-collectie combineert de elegantie van een ronde handgreep met een subtiel gegraveerd detail op de rand. Dit unieke ontwerp zorgt voor prachtige reflecties en roept de verfijnde textuur van een sieraad op. Een perfecte combinatie van stijl en verfijning voor uw deuren.

BERLIN

Berlin is a city of architectural contrasts, where historical buildings stand alongside modern architecture as the past and present intermingle. The Berlin collection is marked by square forms combined with round, circular handle part.

La ville de Berlin se distingue par ses contrastes architecturaux. Les bâtiments historiques y côtoient une architecture moderne où se confondent passé et présent. La collection Berlin affiche des formes carrées alliées à un élément rond et circulaire.

Berlijn is een stad van architectonische contrasten, waar historische gebouwen naast moderne architectuur staan en heden en verleden in elkaar overlopen. De Berlin collectie wordt gekenmerkt door vierkante vormen in combinatie met ronde, ronde handgrepen.

THE
CLASSIC
COLLECTION

The '124' collection was created by Quincalux in 1965, 130 years after the inauguration of the first European railway between Brussels and Mechelen. The inspiration came from the hardware designed for the interiors of the famous Orient Express, produced by the Belgian company CIWL.

La collection « 124 » a été créée par Quincalux en 1965, 130 ans après l'inauguration du premier chemin de fer continental, entre Bruxelles et Malines. Toutefois, elle puise son inspiration de la quincaillerie conçue pour le célèbre Orient Express, produite par la société belge CIWL.

De '124'-collectie werd door Quincalux gecreëerd in 1965, 130 jaar na de inhuldiging van de eerste Europese spoorweg tussen Brussel en Mechelen. De inspiratie kwam van de hardware ontworpen voor het interieur van de beroemde Orient Express, geproduceerd door het Belgische bedrijf CIWL.
